EDUCATION

Diploma in Rural and Surveying Engineering & Geomatics
National Technical University of Athens (NTUA)
Integrated Master's Degree
(5-year cycle, Level 7 EQF, 300 ECTS)

Distinguished Secondary Education Graduate
Ionideios Model School of Piraeus

CORE SKILLS

- Primary Focus: Spatial Analysis, Mapping, Cadastral Operations, Urban & Spatial Planning
- Technical Tools: QGIS, ArcGIS, AutoCAD & AutoCAD Map 3D
- Data & Automation:
  - Python for automating GIS workflows
  - SQL for database management
  - AutoLISP & SCR for CAD
  - PowerShell (PS1 scripts) for acceleration of IT processes

PROFESSIONAL OVERVIEW

(30 Years in Geomatics: A Journey in Spatial Data and People)

I have spent the last three decades working at the intersection of Cartography, GIS and Urban Planning. My career has been defined by a simple principle: whether I am managing the GIS department of a national-scale cadastral project or teaching a student how to make his first map, the goal is always accuracy and integrity.
I believe in a leadership style rooted in trust and open communication. I aim to foster environments where team spirit and creative initiatives can thrive. For me, "attention to detail" isn't a buzzword - it's a responsibility I've carried from my first research project to my current role at CHOROMETRIA. I remain a lifelong student of Geomatics, always looking for the most effective, innovative ways to solve spatial problems.

WORK EXPERIENCE

GIS Project Manager
CHOROMETRIA Consulting Engineers, Athens GR — 2014 - Present

Currently serving as the Head of the GIS Department. My work focuses on the technical coordination and management of large-scale projects that shape the Greek landscape:

- National Land Registry: complex cadastral operations for major regions including the Athens metropolitan area, Voiotia–Fokida Prefectures, South Pilio, Loutraki, Amaliada & Rethymno Crete.
- Spatial Planning: Local Urban Plan studies and Settlement Delimitation projects.

GIS Consultant
GISnet (private study & consultancy office), Athens GR — 1996 - 2014

During these years, I operated as a lead consultant or partner in various consortia. My contribution was providing specialized spatial analysis and maps for studies in Urban Planning, Transportation and Environmental impact.

Owner, Manager & Tutor
ALFA KATARTISI Adult Training Centre, Athens GR — 2001 - 2010

Founded and managed this center, having the privilege of training a wide range of university students and professionals from both Greece and Cyprus. We covered everything from core computer skills to advanced CAD & GIS (ArcGIS, QGIS, AutoCAD Map 3D), helping professionals adapt to the digital demands of the industry.

GIS Technician & Cartographer
AN.DI.P. SA Municipal Development Company, Piraeus GR — 1997 - 2000

Started my professional path within the 'GEORAMA' GIS department. This period was formative, involving me in local municipal studies and several EU-funded research projects alongside European Local Authorities and Universities (e.g., London, Lyon, Girona, Bologna).
